Subject: USDA and US EPA Collaboration on Agricultural Issues Related to PFAS

Good afternoon,

I just volunteered to lead the initial discussions between USDA and US EPA regarding possible collaborative research in the area of agriculture animal and plant toxicokinetics and effects. I apologize for not acting sooner, but I have been on travel for much of the last several weeks.

I am still working on identifying potential investigators on the US EPA side that might contribute to these discussions, but I hope to get a poll out for possible dates/times for a teleconference for later this month.
